Mountain Weather Forecast

Yorkshire Dales National Park

Forecast valid from 00:00 on Sunday 26 Sep 2021 until 23:59 on Monday 27 Sep 2021

Forecast Issued on Saturday 25 Sep 2021 at 14:29

Confidence: High confidence for general theme of settled weather being replaced early next week by more unsettled, cooler, showery conditions, but low for cloud detail and extent of limited warm sunny spells in any breaks on Sunday. Lower confidence in potentially more impactful rain Tuesday.

Headline for Sunday 26 Sep 2021: Cloudy with the odd brighter spell during the afternoon.

Forecast for Sunday 26 Sep 2021

Weather: Cloudy overnight with periods of light rain or drizzle and extensive fog, especially in the west and southwest. Low cloud slowly lifting and breaking during the morning allowing some bright or sunny intervals to develop during the afternoon, as well as the risk of an isolated shower. Cloud thickening again through the evening.

Chance of cloud free mountain/hill tops above 600m: 10% overnight improving to 90% by early afternoon.

Visibility: Very poor overnight with extensive fog, especially over southwest facing slopes. Improving to good by early afternoon with some distant hills visible. Lowering again in any showers.

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

While it remains mild appropriate clothing is essential over higher ground due to the possibility of damp conditions early and late. Navigational difficulties should be expected with the hill fog, especially during the early hours.

Recent rainfall: measured at Malham: altitude 375m
